

# Case Study: Burning Man

A temporary city of 70,000+ — where a Z Private Network turns radical self-reliance into radical abundance.

POPULATION

**~70,000**

DURATION

**9 Days**

UNIQUE FACTOR

**Gift Economy**

## Why Burning Man?

Black Rock City operates as a gift economy, but logistics — water, fuel, art support — still need value exchange. Current methods (cash, donations, outside sponsorships) don't capture the immediacy of abundance within the Playa.

### Opportunity

- Commission a temporary Z Network to anchor gifts in Solar equivalence.
- Support large-scale art with instant transparent funding flows.
- Offer participants proof-of-participation artifacts backed by

## Unique Use-Cases

### Art Grants

Instant Solar funding to artists building large installations.

### Water & Fuel Nodes

Transparent, tax-inclusive settlement for essential supplies.

### Proof-of-Gift Tokens

Digital artifacts honoring community contributions, Solar-backed.

### Playa Power Grid

On-site PPA-style redemption for Solar → kWh equivalence.
